

ANDRZEJ SIDŁO

COUNSELLOR, NUCLEAR ENERGY DEPARTMENT, MINISTRY OF INDUSTRY REP.POLAND

Background

- 47 years old,
- Graduated from IAE Université Lille I France and University of Economy Kraków Poland,
- Previous experience: 10 years of experience as Project manager and Project Director of overseas energy/industry projects (including nuclear) of ZREW/Polimex Mostostal (EU and others)

Actual Position

10 years as Counsellor in Nuclear Energy Department (currently in Ministry of Industry), responsible for:

- Supply chain / local content issues of Polish nuclear program,
- Industry related activities targeting to build up nuclear competencies: implementation of training programs, specialized trade missions, R&D policies,
- Technical regulations within nuclear program

The Ministry of Industry (Ministerstwo Przemysłu), Republic of Poland, plays a central role in advancing nuclear energy in the country. It is responsible for developing and implementing national nuclear policies, ensuring the legal and regulatory frameworks are in place for a safe and sustainable nuclear future. They work closely with independent regulators to maintain high standards of safety and compliance, while also coordinating efforts with other ministries and academic institutions to build a skilled workforce.

Additionally, the Ministry supervises national nuclear labs, guiding research and development strategies to keep Poland at the forefront of nuclear innovation.

The Ministry is also focused on strengthening Poland's nuclear supply chain, developing local content strategies that support the growth of a robust and sustainable nuclear industry in the country.
