

Waste-led decommissioning solutions

CYCLIFE AT A GLANCE

Cyclife's Assets and Experiences

A multicultural experienced entity

What we do

- Management of **radioactive waste** and **contaminated metals**
- **Decommissioning** of nuclear facilities
- **Engineering services** and **software solutions** related to the nuclear back-end

What we aim for

- Transforming **liabilities to assets** by treatment, clearance and recycling
- **Reduction of** waste volume for **disposal**
- Innovative, **safe** and **cost-efficient decommissioning** of nuclear installations

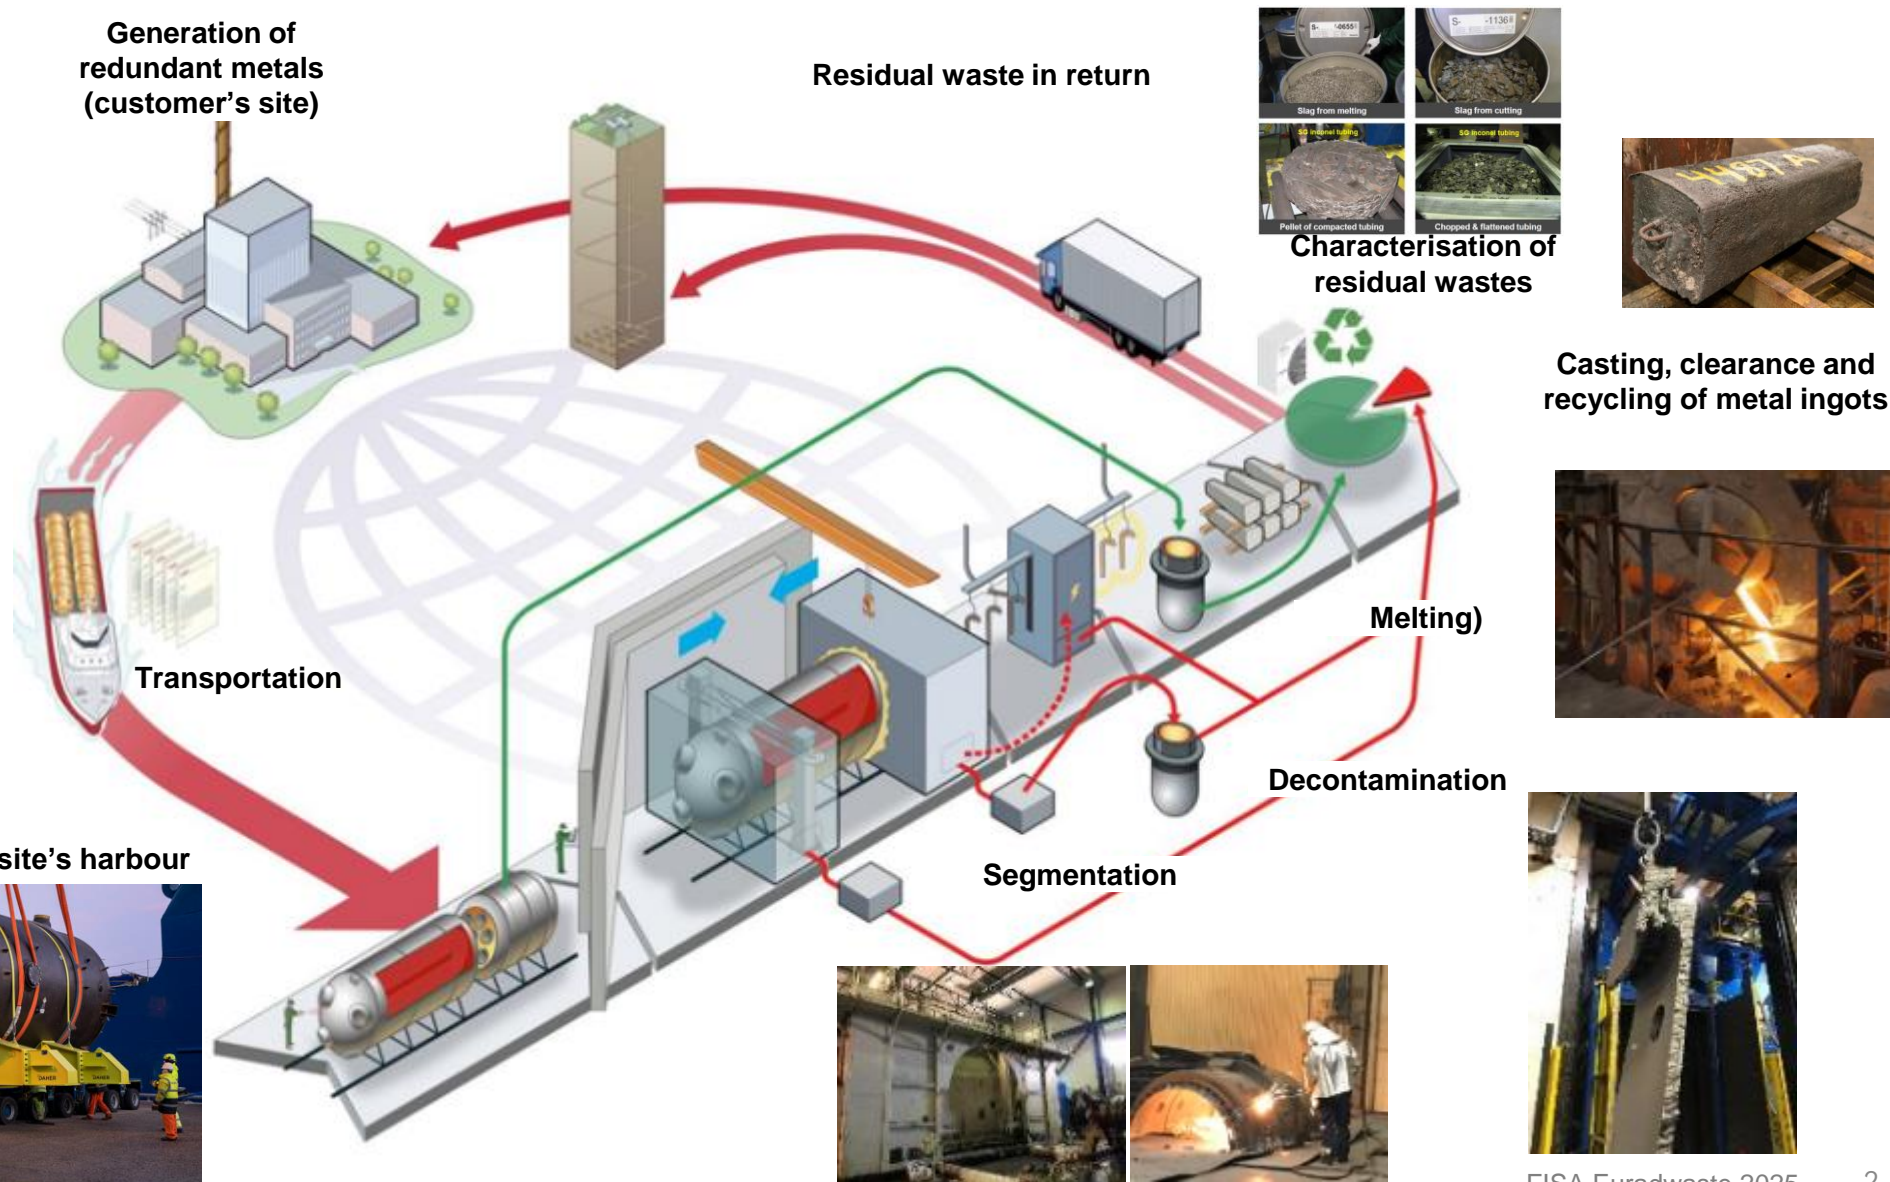

Who we serve

- Nuclear license holders in more than **15 European countries** as well as overseas
- Other parts of the **EDF Group**

■ Our experiences and locations

From project initiation to return of residual wastes

ILLUSTRATION OF CYCLIFE METAL TREATMENT CONCEPT

Example of components treated

PWR STEAM GENERATOR

- Total weight **310-450 tonnes**
- **Recyclable** up to **80%** (today)
- **99.9%** of the **radioactivity** transferred to **the residual waste**
- More than a factor **10** in **volume reduction**
